

## SLOAN – LEADER IN PLUMBING SOLUTIONS.

**W**illiam Elvis Sloan, a pioneering American inventor, transformed the world of plumbing with his ingenious creation, the flushometer in 1906. His visionary approach to flushing technology has led to significant improvements in public health and sanitation, making it an indispensable component of modern plumbing. Sloan is now manufacturing in India providing quality products.

Sloan India is offering numerous restroom products, such as flushometers, integrated sinks systems, faucets, hand dryers, and a range of vitreous china fixtures, along with other allied washroom items.

The TruFlush Flushometer, with its advanced technology and controlled water flushing mechanism, ensures precise volumes and efficient flushing unlike any other conventional flushing systems.

Our AER-DEC® Integrated Sink comprises a soap dispenser, faucet, hand dryer, and solid surface sink – all designed to

**The Indian customer today is grappling with numerous problems like wastage of water and incompatibility of conventional flushing systems with treated water. Sloan products like Flushometers are aptly designed to address such growing demands of the industry.”**

Director, Sloan India

work in sync as one beautiful, hygienic, highly-efficient touch free system. Sloan has an extensive range of sensor-based touch-free faucets and soap dispenser combos, and offers a variety of IoT based and Bluetooth enabled faucets that can be remotely monitored and maintained.

Sloan's comprehensive lines of water closets, urinals, and basins pair perfectly with our industry-leading flushometers and faucets. Our waterfree and hybrid urinals (with JetRinse® Technology) incorporate a worldclass, multi-patented urinal cartridge to filter sediment and trap odours.

Sloan's state-of-the-art center located in Gurgaon is the first Sloan facility in India, producing high-quality products with unmatched precision and efficiency. With a legacy spanning over a century, Sloan is a name synonymous with reliability, innovation, and sustainability. Its commitment to water conservation, cutting-edge technology, and customer satisfaction sets it apart from its competitors.
